Sharon,  
I think the situation is really much worse. Included in these data are untested marijuana samples that were returned to police. Talk to betsy. We really need to cull these out.

Julie

**Subject:** Production down-August Monthly Report

Hi Julie

Just wanted to call your attention to August's report. Sample output (items and cases) for the month of August is down about 20% from July. The nasty side effect from our court issues. I suspect September will be even worse because, at least here in Amherst, our chemists seem to be out of the lab even more this month.

Sharon
